PROFESSIONAL SUMMARY

Passionate and detail-oriented Computer Information Systems (CIS) student with a strong foundation in modern technologies. Adept at full-stack web development, artificial intelligence, and cloud computing. Seeking an opportunity to contribute my technical expertise and problem-solving skills to a forward-thinking organization.

EDUCATION

- **NED University of Engineering & Technology, Karachi, Pakistan**
Bachelor of Engineering (BE) in Computer Information Systems | Aug 2021 – July 2025
- **Malir Cantt College of Science & Technology, Karachi, Pakistan**
Pre-Engineering | 2019 – 2021

EXPERIENCE & INVOLVEMENT

- **Associate AI Engineer – Kodexo Labs (August 2025 – Present):**
Building and deploying production-ready AI/ML systems, leveraging LLMs, RAG pipelines, and intelligent agents to automate business workflows and enhance enterprise solutions.
- **AI/ML Intern – Kodexo Labs (May 2025 – July 2025):**
Designed and implemented Retrieval-Augmented Generation (RAG) systems and AI agents using LLMs and NLP to solve automation challenges.
- **Frontend Developer Intern – Chaynz Tech (Feb 2025 – March 2025):**
Developed and optimized responsive React.js components, improving UI efficiency and user engagement for business-facing web applications.
- **IT Intern – Karachi Development Authority IT Depart. (March 2024 – April 2024):**
Assisted in managing networks, diagnosing issues, and supporting maintenance within the government IT department.
- **Artificial Intelligence Club – NEDUET CIS Society:**
Collaborated on AI-powered web projects, participated in technical workshops, and contributed to inter-university hackathons to promote innovation in AI.

PROJECTS:

- **FYP: Voice Automated Website & App**
Developed an innovative e-commerce platform that allows navigation and interaction solely through voice commands using a Speech-to-Text (S2T) machine learning model.
- **Resource Planning Assistant**
Developed an AI-powered resource planning assistant that preprocesses structured data, and enables project managers to query resource allocation and planning using natural language.
- **Hospital Agent using LangGraph and LangChain**
Developed an agent using LangGraph and LangChain that generates AI-based prescriptions, alerts doctors in emergencies, and schedules patient appointments through intelligent workflows.
- **RAG-Based Document Q&A Website**
Developed a web application using Retrieval-Augmented Generation (RAG) that allows users to upload PDF documents and interact with their contents through natural language question-answering.
- **Crypto Currency Price Prediction**
Trained a machine learning model to predict crypto prices using real-time and historical data.
- **Online Classroom Application**
Developed a MERN-based platform with backend APIs and database integration.
- **Quiz Application (CLI-based)**
Built a Python-based interactive quiz system to enhance problem-solving skills.

CERTIFICATIONS & TRAININGS:

- IBM Data Science Professional Certificate
- CISCO Data Science Course
- Introduction to Langraph
- Open Source Models with Hugging Face
- A.I Workshop (FAST University)

ADDITIONAL SKILLS:

- Event Planning & Management
- Public Speaking & Presentation
- Problem Solving & Analytical Thinking
- Microsoft Office

TECHNICAL SKILLS:

- | | |
|-----------|---------------|
| • Python | • PostGres |
| • PyTorch | • Mongo |
| • SQL | • Langraph |
| • Node | • LangChain, |
| • Next | • Huggingface |
| • Express | • REST APIs |
| | • GitHub |
